SURGICAL SOLUTIONS FOR MINIVASIVE SURGERIES

COMPANY INTRODUCTION

Kangji Medical was established to improve the quality of surgical procedures through advancements in surgical instrument technology.

Founded in the year 2004 and based in one of China's famous laparoscopic instruments region Tonglu, we now provide an extensive range of laparoscopic instruments which offer ease of use as well as improved safety and efficiency.

All our products are CE-ISO marked and fully comply with all the current international quality standards. Our quality management system is certified according to ISO13485 International Standard, which ensures consistent and high quality processes for developments and manufacturing.

Our strength is our will to provide the end users with innovative, high quality reusable and disposable products for both open and laparoscopic surgeries at an affordable price. We believe that our products deliver what today's highly skilled surgeons are looking for in terms of performance, ergonomics and quality.

Our engineering team work closely with surgeons, combining leading design with high-end manufacturing in order to create solutions to common surgical problems with commitment to improve patient outcome and enhance product safety. We strive to achieve excellence and continually embrace innovative approaches to design, develop and manufacture high-quality medical devices in order to provide better ODM and OEM services.

CONTENTS

ACCESS

01-10

- Disposable Optical Trocar
- Disposable Auto Shielded Trocar
- Disposable Bladeless Trocar
- Disposable Balloon Trocar
- Disposable Pediatric Trocar
- Disposable Single Port
- Disposable Thoracoscopic Trocar
- Disposable Orthopedic Trocar

HAND INSTRUMENTS

11-18

- Disposable Monopolar Instruments
- Disposable Monopolar HF Electrode
- Disposable Monopolar HF Electrode with Smoke Suction
- Disposable Bipolar Forceps
- Disposable Bipolar Forceps with Cutting
- Reusable Instruments (Disposable Shaft + Reusable Handle)

LIGATION SYSTEM

19-20

- Polymer Ligation Clip
- Polymer Clip Applier
- Titanium Ligation Clip
- Titanium Clip Applier

OTHERS

21-24

- Disposable Retrieval Bag
- Disposable Incision Dilator
- Disposable Suction/Irrigation Set
- Disposable Veress Needle

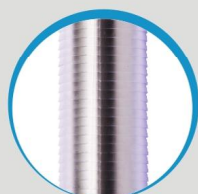

Disposable Optical Trocar

Features

- Optical tip provides direct visualization and eliminates blind entry.
- Separates, rather than cuts, along tissue fibers, pushing tissue and vessels away to achieve a low rate for incisional hernia.
- Dual universal seal with no reducer needed, effectively maintain abdominal pneumoperitoneum while instruments exchanging from one to another.
- Allows extraction of larger specimens through removable outer seal.
- Single use to prevent cross infection.

Universal seal

Threaded design

Optical

Detachable Housing

Disposable Auto Shielded Trocar

Features

- Uniquely designed blade divides tissue cleanly and precisely with control upon insertion through the abdominal wall;
- Safety lock indicates when blade is shielded or exposed.
- Ergonomic trocar handle and stopcock with adequate length.

Disposable Bladeless Trocar

Features

- Cross-shaped gland bush reduce smudging during endoscope reinsertions.
- Two layers (Umbelliform gland bush and Cross-shaped gland bush) sealing system achieve excellent sealing performance.
- Threaded design maximizes abdominal wall retention.

Disposable Balloon Trocar

Features

- The combined advantages of the balloon and fixation ring or soft anchor configuration create a stable entry port which delivers an excellent tamponade effect to stop bleeding while reducing the gas loss at the port-site.
- Balloon design to reduce migration of the trocar sleeve no dislocation will occur when instrument exchanging.
- Facilitates direct visualization during trocar placement. This provides the surgeon with more control and reduced trauma of patient.

	Balloon cannula (12*100mm)	101Y.907-1000	6

Disposable Pediatric Trocar

Features

- With compact structure, designed specially for infants and young children.
- Reduced OD diameter is of great significance to minimize the incision, which allows patients get earlier and faster recovery.
- Special design for abdominal wall fixator, enables trocar core sheath stable fixation at the desired point, preventing unnecessary movement during the operation.
- Cannula body adopts stainless steel material to ensure the hardness in the operation.

Product specification

Product	Description	Model Name	EA/BX
Pediatric Trocar	Cannula + Obturator (3*50mm)	101Y.201	10
	Cannula + Obturator (5*80mm)	101Y.203	10

Disposable Single Port

Features

- Integrated seal system eliminates the need of trocars.
- Removable seal cap for easy specimen retrieval.
- Offers unmatched articulation.
- Maintains pneumoperitoneum.
- Reduces the risk of wound infections.

Product specification

Product	Description	Model Name	EA/BX
Single port	Cannula (Φ5*3, Φ10*1) + Wound protector 50mm	101Y.F42	4
	Cannula (Φ5*2, Φ10*1, Φ12*1) + Wound protector 70mm	101Y.F53	4
	Cannula (Φ5*2, Φ10*1, Φ12*1) + Wound protector 90mm	101Y.F63	4

Blunt Tip

Removable seal

Threaded cannula

Disposable Thoracoscopic Trocar

Features

- Threaded flexible sleeve with a shroud at its proximal end to protect against foreign materials entering the chest cavity, and for instrument stabilization.
- Blunt tip prevents damage on the viscera.
- Removable seal enables a convenient withdraw of the specimen during operation.
- Single use to prevent cross infection.

Product specification

Product	Description	Model Name	EA/BX
Thoracoscopic Trocar	Cannula + Obturator (6*65mm)	101Y.510	10
	Cannula + Obturator (10*65mm)	101Y.512	10
	Cannula + Obturator (12*65mm)	101Y.513	10

Disposable Orthopedic Trocar

Features

- Unique design on the obturator tip ensures a small incision resulting in less surgical trauma.
- Transparent cannula enables visualization during arthroscopic surgery.
- Color-coded obturator for easy identification.
- Single use to prevent cross infection.

Product specification

Product	Description	Model Name	EA/BX	Obturator Color
Orthopedic Trocar	Cannula + Obturator (6*100mm)	101Y.550	18	White
	Cannula + Obturator (6*120mm)	101Y.551	18	Yellow
	Cannula + Obturator (8*100mm)	101Y.552	18	Purple
	Cannulas + Obturator (8*120mm)	101Y.553	18	Green

Disposable Monopolar Instruments

Features

- Ergonomically designed handle comfortable grip and full functionality.
- Customized color of rota-tor ensure an instant instrument identification in the sterile field.
- On/ Off ratchet mechanism.
- Easy and precise jaw motion with maximum opening.
- Curved scissors available with full insulation to the working tip of the scissor blade for increased safety.
- Both 330mm & 450mm are available for regular and bariatric surgery.

Disposable Monopolar HF Electrode

Features

- Light weight, ergonomic handle design for precise controlled tissue dissection.
- Fully-insulated 330mm Teflon coated shaft for maximum insulation and safety.

Disposable Monopolar HF Electrode with Smoke Suction

Features

- Ergonomic handle ensures comfort and easy control during operation.
- Smooth rotation on the spatula option guarantees a 360° electrical coagulation or cutting.
- Smoke suction provides a clear visual field of operation and ensures safer operation.

Curved jaw

Straight jaw

Cutting blade

Disposable Bipolar Forceps

Features

- Dual action tips ensure a large opening of dissecting.
- Ergonomic handle increases comfort during operation.
- Rotation design ensure a 360° rotation during surgery.
- Compatible with most electron-surgical generators.

Disposable Bipolar Forcep with Cutting

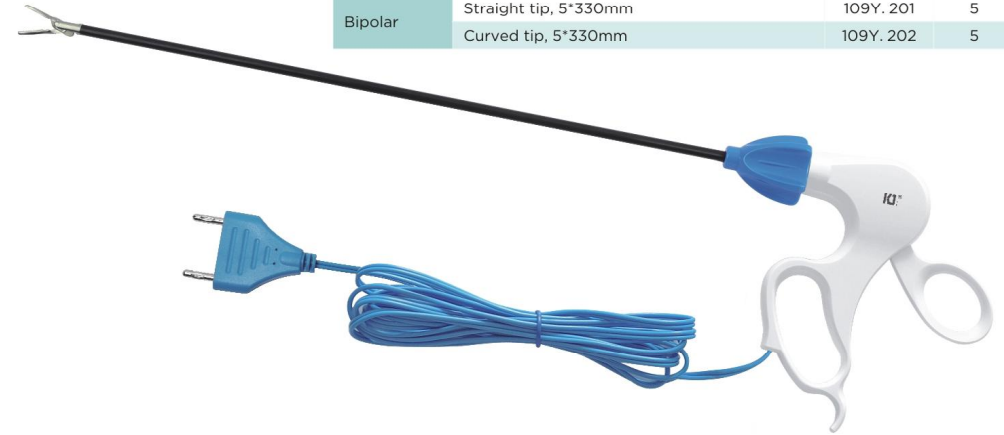

Features

- Ergonomic designed handle for comfortable grip and full functionality.
- 15° jaw opening for vessels up to 4mm.
- Angled tooth design for secure grasping.
- Grasping, dissecting, coagulation & cutting functions all in one instrument, ideal for complex and time consuming procedures.
- Optional ratchet mechanism can reduce fatigue while maintain proper grasping.
- Cutting is achieved through bipolar energy, not mechanical action of a knife blade.
- Suitable cutting trigger position can reduce the fatigue of single hand operation.

Polymer Ligation Clip

Features

- Three sizes to ligate tissue structures from 3mm to 16mm
- Integrated teeth to ensure greater stability and prevent slippage on the tissue
- Distinct tactile feedback confirms jaw seating and secure vessel placement
- Clips delivered in color-coded cartridge for easy identification
- Clips does not interfere with CT, MRI, or X-ray diagnostics

Product specification

Disposable Retrieval Bag

Features

- High strength TPU bag material assures no leakage.
- Self -opening design provides easy and safe specimen retrieval.
- Soft and transparent TPU ensure a visualization during surgery.
- No rope design with Ni-Ti supporting ring ensures a good shape memory.
- Rope design with 304 supporting ring ensures a better support for bigger specimen.
